Housing and Community Access: Inclusive Planning for Success

Presentation to:
APA, Idaho Chapter
October 9, 2020
Introductions

• Erik Kingston, PCED
• Stephen Miller, J.D., M.C.P., AICP | U. of I.
• Dianna Willis, M.A., M.Ed.
• Jeremy Maxand, M.A.
• Dana Gover, MPA
What we’ll talk about

• Overview: Fair Housing and Community Access Basics*
• Inclusive Planning: Legal Framework
• Idaho Access Project: Resources and focus
• Visitability
• NW ADA Center-Idaho
• Questions and discussion

*This section is the sole responsibility of IFHA supported by HUD grant funds
Creating great communities for all requires a built environment that features:

- Housing types and price points that meet the needs and incomes of all residents and provide housing choice
- Infrastructure that provides access to essential community services, employment, social, cultural and recreational assets

* This section is the sole responsibility of IFHA supported by HUD grant funds
Supporting Housing Choice and Diversity

• Demand-side planning; what locals need and want
• Housing types/costs should reflect demographics
• Housing types/costs should be distributed through community
• People have a right to live where they choose and can afford
• Expanding housing choice is everyone’s job
Demographics and economic impact

• 204,780 Idahoans live with one or more disabilities
• 13% overall; 11% of adults; 37% of seniors
• Often more subject to housing inflation and discrimination
• Along with friends, family, coworkers, they contribute to Idaho’s economy in many ways
Disability defined*

Any person who (a) has a physical or mental impairment which substantially limits one or more of such person's major life activities, (b) has a record of such an impairment, or (c) is regarded as having such an impairment.

Major life activities include caring for one's self, walking, seeing, hearing, speaking, breathing, working, performing manual tasks, and learning.

% of adults with functional disability types*

- MOBILITY: 13.7% (Serious difficulty walking or climbing stairs)
- COGNITION: 10.8% (Serious difficulty concentrating, remembering, or making decisions)
- INDEPENDENT LIVING: 6.8% (Difficulty doing errands alone)
- HEARING: 5.9% (Deafness or serious difficulty hearing)
- VISION: 4.6% (Blindness or serious difficulty seeing)
- SELF-CARE: 3.7% (Difficulty dressing or bathing)

Persons with Disabilities (PWD) are affected by
• Availability of affordable and inclusive housing
• Programs/policies to ensure housing integration in a variety of settings
• Access to economic opportunity

Source. 2017 Assessment of Fair Housing | State Independent Living Council
1. An accessible building entrance on an accessible route
2. Accessible public and common use areas
3. Usable doors (usable by a person in a wheelchair)
4. Accessible route into and through the dwelling unit
5. Light switches, electrical outlets, thermostats and other environmental controls in accessible locations
6. Reinforced walls in bathrooms to support grab bars
7. Usable kitchens and bathrooms

Section 504 of the Rehabilitation Act

• “no otherwise qualified individual shall, solely by reason of a disability, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.”

• Section 504 design and construction requirements apply to housing developments constructed with or receiving federal funding, and are generally more rigorous than those required by the Fair Housing Act.
Americans with Disabilities Act

The ADA primarily covers access to public spaces, programs and events.

The Act covers employment, state and local government, public accommodations, telecommunications and transportation.

ADA laws and design requirements also apply to certain public or common areas of multifamily housing complexes.
“The most integrated setting is one that enables individuals with disabilities to interact with nondisabled persons to the fullest extent possible, consistent with the requirements of the Americans with Disabilities Act.”*

Highest concentration of seniors and PWD live in rural and northern Idaho counties with:

- Greater access challenges
- Older housing stock, less accessible/visitible
- Transit, sidewalks and services are scarce

Source. 2017 Assessment of Fair Housing | State Independent Living Council
2017 Assessment of Fair Housing: Key findings

• Housing choice for PWDs due to the lack of available, affordable, accessible housing, esp. single family.

• Lack of public transportation limits the communities in which PWDs can live independently

• Inaccessible public buildings and commercial establishments and infrastructure (e.g., lack of or non-compliant sidewalks) persist in many, particularly older and rural, communities.
